### (54) FOOD PRESERVATION

#### (57)Abstract:

PURPOSE: A volatile substance with preservative effect is packed in a punch made of a macromolecular continuous film with controlled permeability and the resultant punch and a food product are packed together and sealed tightly to preserve the food product.

CONSTITUTION: A volatile substance with an effect of preserving food products such as ethanol, acetic acid, propionic acid, malic acid, lactic acid, citric acid, and other organic acids, cinnamon oil, garlic oil, onion oil, masturd oil, pimentberry oil, oleo oil and other essential oil, is packed with a macromolecular continuous film 2 such as 2 (cellophane, acetylcellulose, acetylbutyryl cellulose, propionyl cellulose, completely saponified polyvinyl alcohol). Then, the resultant packed volatile substance 3 and a food product 4 are tightly sealed together in a formed vessel 5.
